PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience in building web applications using Java, Spring Boot, MySQL, HTML, CSS, React, and REST APIs. Developed real-world projects including Health Alert, a health awareness platform with symptom-based disease prediction and health risk assessment, and Fraud Job Detector, a web application designed to identify potentially fraudulent job postings. Strong understanding of OOP concepts, backend development, CRUD operations, database management, and MVC architecture. Passionate about building practical software solutions and continuously improving technical skills.

TECHNICAL SKILLS

Backend:	Java, Spring Boot, RESTful API Development (CRUD Operations)
Frontend:	HTML, CSS, Bootstrap, JSP, Thymeleaf, JavaScript
Database:	MySQL — schema design, SQL queries, data integration
Tools:	Spring Tool Suite (STS), VS Code, Postman, Git & GitHub, Railway
Concepts:	OOP, MVC Architecture, RESTful Design, Web Application Development

EXPERIENCE

Java Full Stack Developer Trainee — iSoft Training Institute, Telangana | 2023

- Trained in Core Java, JavaScript, SQL and Spring Boot for full stack web development
- Built web applications using Spring Boot and REST APIs with hands-on backend practice
- Tested and validated API endpoints using Postman throughout the training program

PROJECTS

Health Alert -Smart Health Assistant | Java, Spring Boot, SQL, React,

- Developed a bilingual (English/Telugu) health awareness web application.
- Implemented symptom-based disease prediction and health risk assessment.
- Added disease explanations, causes, precautions, doctor recommendations, and food guidance.
- Built medical report analysis and PDF report generation functionality.
- Integrated emergency health alerts and nearby hospital navigation.
- Developed REST APIs and managed database operations using Spring Boot and SQL.

Fraud Job Detector | Spring Boot · MySQL · REST APIs · HTML/CSS · Bootstrap

- Developed a web application to detect fraudulent job postings using URL validation and status
- Designed backend using Controller–Service–Repository architecture (MVC pattern)
- Integrated MySQL database for storing job reports and user inputs
- Implemented validation and exception handling for secure API responses

Hospital Management System (HMS) | Spring Boot · Thymeleaf · Bootstrap · MySQL

- Developed a full-stack hospital management system for managing patients, doctors, and appointments
- Designed and implemented a role-based dashboard for admin and hospital staff
- Displayed real-time summary data such as total patients, doctors, and appointments
- Integrated CRUD operations with Spring Boot REST APIs and MySQL database
- Built responsive UI using Thymeleaf and Bootstrap for better user experience

EDUCATION

B.Tech — Computer Science & Engineering — Aurora's Technological and Research Institute, Telangana (2022)

Diploma — Mechanical Engineering — Jaya Prakash Narayan Education Society Group of Institutions (2018)

SSC — Abraham Memorial High School, Telangana (2013)
